

Objects: Motor holder (2 parts on top), 90deg connector (left), table clamp (next page)  
Material: Aluminium; Tolerances:  $\pm 0.1\text{mm}$ ; Scale: 1:1

The motor holder is fitted for a ASTROSYN MY4001 motor  
("Size 14 Mini Hybrid Stepper Motor").

Motor Holder and 90deg connector are connected by a  
10mm stainless steel rod that is clamped between part 1 and 2 (hatching) and inserted and fixed in the 10mm hole.

The 90deg connector connects to a table clamp (part 5 and 6) by  
a 10x10mm stainless steel bar (grey hatching) and is used to adjust height.

The table clamp connects to the table using a M8 screw  
with a flattened tip or protective cap.
